Mit freundlichen Grüßen
Dr. Freude
(Veterinarian)

In accordance with EC regulation No 998/2003, our laboratory has been recognised by the European Commission (Decision 2006/48/EC) to perform rabies antibody testing for travelling pets.

Anmerkung..:

- 1) For submission of whole blood samples please note:
 - Glucose is not tested anymore from whole blood.
 - Fructosamine, potassium, LDH, phosphate and CK values may be false high.
- 3) Shifts in serum protein- and serum albumin concentrations can lead to changed calcium values. Therefore a correction formula is used to adjust the total calcium value.
- 4) Basophils up to 200/ul are considered normal in the literature.
- 5) Cooperating laboratory
